SUMMARY

An AI & ML Engineering student with a Diploma in Computer Engineering, experienced in Flutter, Firebase, and full-stack Android development, building real-world applications with a focus on scalable and AI-integrated solutions.

WORK EXPERIENCE

Flutter Development Intern · Branding Catalyst May 2025 - Jul 2025

- Completed an internship focused on Flutter application development.
- Worked with Dart, Flutter UI design, and Firebase backend integration.
- Learned practical mobile app architecture, UI structuring, and real-time database usage.

Project Experience

- Social Parivartan (Diploma Final Year Project)
Built a full-stack Android application aimed at social impact and community engagement.
- Water Business Inventory & Billing System
Developed a real-world side project to manage stock, intake tracking, and billing operations.
- Collabify - AI-Powered Brand & Influencer Collaboration Platform
Built an AI-based platform to connect brands with relevant influencers for seamless campaign collaborations.

EDUCATION

B.E. in Artificial Intelligence & Machine Learning (Pursuing) 2025 - 2028

Universal College of Engineering (UCOE)

Diploma in Computer Engineering 2022 - 2025

Vidyavardhini's Bhausaheb Vartak Polytechnic, Vasai

SKILLS

- Backend & Database: Firebase, Firestore Integration, SQL
- Domains: App Development, Generative AI, Blockchain, Data Analysis
- Programming: Dart, Python, JavaScript, HTML, CSS, Java
- Tools & Technologies: React.js, Node.js, Express.js, TensorFlow, Flutter
